## Mortgage Rates Push Farther Into 4-Year Highs

**Mortgage rates** moved **somewhat higher** again today, thus pushing them farther into the highest levels in more than 4 years. This isn't the result of anything that happened today, but rather an ongoing process whereby the bond market (which underlies rates) is coming to terms with big-picture, long-term headwinds mentioned in the bullet points at the bottom of this article.

Whereas rates had leveled off and even improved somewhat during March and early April, they've quickly shown more volatile colors. Borrowers are definitely seeing rates that are an eighth of a point higher from last week and, in many cases, a quarter of a percentage point higher than 2018's best levels.

Tomorrow brings several flashpoints that keep the volatility potential high. These include the 1st report on Q1 GDP, and important Treasury auction (which acts as a gauge of investor demand for bonds), and the biggest day of this "earnings season" (more of a factor for stocks, but stock trading can occasionally spill over and affect bonds/rates).

30 YR Treasury	4.6599	-0.0112

Pricing as of: 5/6 11:56AM EST

## Responsive service, experienced expertise

I've dedicated my 22 year mortgage career to client education, superior service, and honest answers. The lending landscape has changed dramatically the past few years, and continues to do so. My job is to ensure client partners' loans close quickly, without surprises, and I take that responsibility very seriously. Referrals are a responsibility I appreciate; they're a measure of trust, and that trust must be earned every day, on every referral.
