# Strong Week for Purchase and Refi Applications

Mortgage applications made a strong showing during the week ended April 8 and for the first time in a while the gains were fairly evenly distributed between refinance and purchase applications. The Mortgage Bankers Association (MBA) reported that applications overall **increased by 10 percent** on both a seasonally adjusted and an unadjusted basis compared to the week ended April 1.

The **Refinance Index** built on its 8 percentage point rebound the previous week, rising 11 percent to its highest level since February. The share of applications that were for refinancing increasing from 54.5 percent to 5.9 percent.

The seasonally adjusted **Purchase Index** increased 8 percent from one week earlier to its highest level since October 2015. The unadjusted Purchase Index was up 9 percent compared with the previous week and was 24 percent higher than the same week one year ago.

Mike Fratantoni, MBA's Chief Economist said, "Helped by a persistently strong job market and low rates, applications for both conventional and government home purchase loans increased last week. The purchase index was at its second highest level since May 2010. Applications to refinance also increased as the 30-year contract rate decreased to its lowest level since January 2015."

The **FHA share** of total applications fell to 10.8 percent from 11.3 percent and the VA share dipped to 11.9 percent from 12.2 percent. The USDA share of total applications remained unchanged at 0.8 percent.

Most mortgage rates edged down from previous levels. The average contract rate for **30-year fixed** rate mortgages (FRM) with conforming loan balances of $417,000 or less fell 4 basis points to 3.82 percent. Points increased to 0.33 from 0.32 and the effective rate declined from a week earlier.
