ALERT: Negative Reprice Risk Increasing Again

10yr yields just broke convincingly higher past the day's potentially supportive ceiling and MBS are coming along for the ride. The apparent source of the move is yet another unsubstantiated report on a Greek aid deal. It will likely soon be refuted and trading levels will likely reflect that. But for now, negative reprice risk is higher than it was previously. Most lenders are at risk.

Responsive service, experienced expertise

I've dedicated my 26 year mortgage career to client education, superior service, and honest answers. The lending landscape has changed dramatically the past few years, and continues to do so. My job is to ensure client partners' loans close quickly, without surprises, and I take that responsibility very seriously. Referrals are a responsibility I appreciate; they're a measure of trust, and that trust must be earned every day, on every referral.
