The Week Ahead: Limited Data, Bond Auctions, and More Indecision

The basic candlestick or bar chart that the average bond analyst uses to track 10yr Treasury yields is doing a good job of capturing the current opposing forces in rates. **On the one hand**, the combination of economic data, NAFTA 2.0, and Fed comments (among other things) makes a logical case for higher rates. This is easily seen as the pervasive series of "higher lows" over the past 2 months.

On the other hand, doubts about the sustainability of lofty economic numbers and doubts about the market's ability to thrive with 10yr yields over 3.25% make a case for support. This can be seen in the less-developed series of "lower highs" leading back from the long-term high 2 weeks ago.

The result is the typical triangle--a consolidation pattern where the higher lows and lower highs eventually collide. The takeaway from such triangles can be as simple as saying "**oh look, there's a triangle**. There must be some indecision around these levels!" or as presumptuous as "rates are clearly storing energy in anticipation of a big breakout."

Either way, the triangle **will have to be broken** early this week. It wouldn't be a surprise to see an underwhelming follow-through, given the sparsely populated economic calendar. Bigger-ticket reports don't show up until the 2nd half of the week and even then, the reports aren't the biggest market movers recently.

3.18% (where we're starting out today) has been a short-term pivot point of some significance. It's been more willing to act as a ceiling recently, but is being approached as a floor coming down from Friday's higher levels. If it results in a bounce toward higher rates, 3.21-3.22% would be the next level to watch, based on last week's highs. If rates can continue to **rally**, 3.13% remains the level to beat.

Responsive service, experienced expertise

I've dedicated my 22 year mortgage career to client education, superior service, and honest answers. The lending landscape has changed dramatically the past few years, and continues to do so. My job is to ensure client partners' loans close quickly, without surprises, and I take that responsibility very seriously. Referrals are a responsibility I appreciate; they're a measure of trust, and that trust must be earned every day, on every referral.
