Mountains vs Molehills: What Rates Really Cared About This Week

Mortgage rates ended the week moderately higher, but things could have been slightly worse without Wednesday's surprisingly sharp drop in longer-term Treasury yields (a key benchmark for mortgage rates). The cause was an announcement about Treasury's bond buyback program--a subject that made far more noise than its lasting impact warranted.

The week began with the same market mover we've grown accustomed to since the Iran war: oil. Renewed threats from Iran and the seizure of a UAE tanker in the Strait of Hormuz pushed oil prices and Treasury yields higher on Monday. By Tuesday morning, the 10yr yield briefly touched 4.75%, a level that attracted enough bond buying to help the market stabilize.

Wednesday began with news that Treasury would at least double the maximum size of certain long-term buyback operations, from $2 billion to $4 billion, beginning September 9th. Despite the name, this isn't quantitative easing (QE), and Treasury isn't creating money to force rates lower. It already buys back older, harder-to-trade bonds to improve market liquidity, funding the purchases through its normal cash and borrowing operations.

Investors nevertheless reacted aggressively because the change was focused on Treasury debt maturing in 10 to 30 years. The 30yr yield fell almost one-tenth of a percentage point, while the 2yr yield moved slightly HIGHER (with an "h"). That divergence is the key clue: this was not broad stimulus for rates. Mortgage rates fell as well, but not nearly as much because mortgage-backed bonds typically last only 5 to 7 years as homeowners sell, refinance, or otherwise pay off their loans.

By Thursday, the one-time adjustment had largely run its course. The headlines continued after Treasury Secretary Bessent discussed the program on television, but the actual trading returned to oil prices. Oil jumped overnight, and Treasury yields followed almost perfectly. Elevated corporate bond issuance from hyperscalers added background pressure (an esoteric topic, but suffice it to say that heavy corporate bond issuance coincides with higher rates across the board, all else equal).

National Average Mortgage Rates

Mortgage News Daily	Rate	Change	Points
30YR Fixed	7.51%	+0.01	0.00
15YR Fixed	7.04%	+0.01	0.00

By the end of the week, oil prices were even higher than they were on Tuesday, yet the 10yr Treasury yield remained slightly lower. In that limited sense, Wednesday's announcement provided a reset for longer-term yields. But after that reset, yields continued higher for the same reasons they likely would have risen without the Treasury news--especially oil prices and heavy corporate bond issuance.

The following chart has the same lines as the previous chart, but with different y-axis scaling to highlight Wednesday's "reset" for the bond market.

Friday offered little new direction, although a modest shift toward higher expected Fed rates added some late pressure. Next week brings a much busier economic calendar and the Fed's annual Jackson Hole conference, including comments from Fed Chair Warsh. Those events should give the market something more substantial than this week's buyback melodrama.

Responsive service, experienced expertise

I've dedicated my 26 year mortgage career to client education, superior service, and honest answers. The lending landscape has changed dramatically the past few years, and continues to do so. My job is to ensure client partners' loans close quickly, without surprises, and I take that responsibility very seriously. Referrals are a responsibility I appreciate; they're a measure of trust, and that trust must be earned every day, on every referral.
